Nguyễn Quang nhật

Back-End Developer

📞 0849490856   ✉ nguyenquangnhat.work@gmail.com   🔗 https://github.com/NguyenQuangNhatSidSid   📍 Thủ Đức, TP.HCM

OBJECTIVE

I look forward to learning, gaining experience in programming, and participating in a dynamic working environment. I look forward to learning and applying my knowledge and skills to contribute to the community. Thereby improving your teamwork ability and technical skills to become a Full-Stack programmer.

EDUCATION

FPT University TP. HCM   2018 - 2024

Software Engineer

I have completed all academic requirements and officially graduated in June.

I am currently awaiting the formal issuance of my diploma. At school, I learned and was exposed to much knowledge from programming, data, web design, user requirements...

WORK EXPERIENCE

FPT software   05/2022 - 08/2022

Back-End Developer

Intern at FPT software, during the internship period, participate in a project to manage
class schedules and write APIs to retrieve information and process data by using Java Springboot. In this project, I learned a lot of things, from how data runs, and how to handle data effectively and secure data and code.

PROJECT

Group 5 person   1/2024 - 5/2024

Position :BACK-END DEVELOPER

Project name: BIRD FARM MEAL SYSTEM.

Write APIs that comply with SOLID principles to easily maintain code. Complete API development of tasks, menus, plans,...
Technology: C#, Entity Framework, Microsoft SQL Server.
Use SQL Server to save data and Firebase to get URL, and use C# to write data processing API.
Github: https://github.com/NguyenQuangNhatSidSid/BirdFarmMeal
Youtube: https://youtu.be/F9Cnld84stE

Personal Project   6/4/2024 - 25/4/2024

Position: BACK-END DEVELOPER

Project name: LOCAL FOOTBALL PLAYER.

Use RESTful API, and JWT authentication to secure access and protect data. The data tables are generated from my soccer experiences.
Technology: NodeJs, express, jest, MongoDB.
Use MongoDB to store data, and use NodeJs, express to write API to manipulate that data.
GitHub : https://github.com/NguyenQuangNhatSidSid/localFootBallPlayer-Backend

SKILLS

JS, NODEJS, JAVA, C#, ASP.NET, ENTITY FRAMEWORK, MS SQL SERVER, MONGODB.	I understand the basic process required to create an API and an understanding of the SOLID principles required to maintain a project, how the project runs, how it works, and data flow from where to where, and what my project needs to be more effective, and I got some experience with HTML, CSS, Bootstrap, React.
ENGLISH	Communicate and present, read documents and I know a little about Japanese.
INTERESTS	Football, reading novels, articles about AI technology.
